

Single-use Gloves

The COVID-19 pandemic has dramatically raised the global demand for single-use gloves which has led to shortages on a number of our regularly offered glove styles.

We understand that these shortages continue to cause challenges for our customers and we have been working diligently to identify and onboard new sources of gloves that meet all European market quality and regulatory requirements.

This flyer contains a selection of available nitrile and latex gloves. All of these are currently in stock across Europe and available to meet immediate demand.

If you are interested in purchasing these alternative gloves, you can either order directly from the website or contact your Account Manager.
